

The 5 stages?

Where are you?

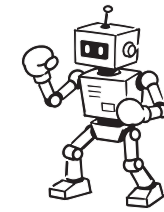

SHORTCUT LIST

/WORKSHOP

Compressed 20-30 min. session for workshop or classroom settings.

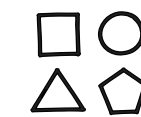

/SPARRING

For when you already have an idea and want CISCA to push back on circularity, feasibility and user value

/CRITIC

Structured assesement: what's strong, what's weak, what's missing?

/VARIATIONS

Five fundamentally different circular takes to the same challenge

/BRIEF

Translate your concept into a technically grounded design brief

/VISUALIZE

Generate sketches, system diagrams, or storyboards whenever you need them.

/EXPORT

Generates at any point in your flow a structured concept sheet in markdown.

/SETTINGS

Configure: role, depth, language, brief type and visualization preference.

the CIRCULARITY TEST

A. VALUE PRESERVATION

What stays valuable?

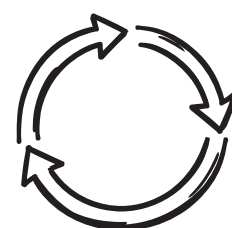

Material, component, product, relationship or service?

B. LOOP DESIGN

How does it come back?

Who returns it, why, and what happens after return?

C. SYSTEM FIT

Can this work in the real world?

What behaviour, partners, infrastructure, business model or policy does it need?
